

FIG. 1

These drawings were made from the original design of the part shown. It is the responsibility of the designer to ensure that the dimensions and tolerances shown are correct and that the part is manufactured to the required specifications.

FIG. 1 is a perspective view of the device in accordance with the present invention, showing the device in a closed position. The device includes a housing 100, a lid 102, and a handle 104. The housing 100 is formed by a front wall 106, a back wall 108, and side walls 110. The lid 102 is hinged to the front wall 106 and is shown in a closed position. The handle 104 is attached to the front wall 106 and is used to open the lid 102. The device is shown in a perspective view, with the front wall 106 and the lid 102 being the most prominent features.
